

Hello

I would like to make a submission to the Federal Governments Full Review of Taxation. I urge the Government not to abolish our dividend-imputation system, our economy & businesses cannot go back to the days of double taxation this would put an end to many businesses which rely on capital coming from shares invested into companies. I support a reduction of the company tax from 30% to 25% with the dividend-imputation system kept as is.

Kind Regards,

Jeff
