

A solution is quite simple. Despite the governments request that GST BE LEFT ALONE, this is the answer.

Make everything subject to GST, increase the rate , maybe 12.5% even on statutory charges. Society needs a user pays system.

reduce personal taxes , possibly a flat rate 17.5% on \$18000 to \$80,000 and 25% thereafter. The first \$18,000 tax free and dispense with low income rebate.
set company tax rate at 25% retain franking credits.

Maybe some of these could be lower if GST set at 15% and states forced to drop stamp duty and set minimum wage levels for payroll tax much higher than at present.
