

Australia's Future Tax System Review

Dear Chairman

We are alarmed self funded retirees living off what income we can generate from our super fund. Our share portfolio is significantly down in value. Our income from interest is significantly reduced. The saving grace is franked dividends. If these go support for Australian shares will fall dramatically as they lose their attraction for Australian investors. There will be such hardship caused to Australians (retirees, working families and beneficiaries of the Future Fund) – all in the cause of appealing to overseas investors.

So we ask - HOW MANY MORE OF US DO YOU WANT APPLYING FOR THE AGED PENSION?

We urge you to maintain the current dividend imputation system.

Yours in hope

Joan and Greg Monteith
