

Flowing on from Noel Whittaker's recent newspaper article where the rumours are that: REMOVAL OF THE IMPUTATION OR FRANKING CREDITS ATTACHED TO DIVIDENDS is being considered by the Federal Government.

For self funded retirees, such as my wife and I, (in our mid seventies) whom depend on the current dividend imputation system, any change to the current system would be a disaster for all retirees, and in the main, who also voted for this current government.

Surely this rumour is only that - hopefully so - as I am certain if it turns out not to be a rumour - we would expect the government will get a severe backlash at the next Federal election. Please leave the current system alone.

Reverting back to Double Taxation is not in the peoples interest - nor - elected members of Government.

Respectfully,

Robert, Jean and Shand Family members
