

I would ask that this submission be taken with serious consideration to

Urge Australian Government support for international implementation of the Currency Transaction Development Levy (CTDL) that would tax the richest market of all, the trade in foreign exchange, worth a staggering \$3,200 billion daily.

Urge a reversal of the trend to lower corporate and personal income taxes, a trend that has benefited the rich at the expense of the poor over the past decade.

The German Government has decided to revamp its motor vehicle tax so that in future the rate depends on the amount of carbon emitted from exhausts. Urge the taxation review to recommend the Australian Government negotiate a similar arrangement with the States.

Urge the Australian Government to do more to stop wealthy Australians from using tax havens to avoid their responsibilities.

I and many Australians have a great faith in this Labor Government to show leadership and take the helm in our country and to show by example to other countries that to take a stand on behalf of the people the ordinary Australians that believe in you!. The recent global financial crisis has been a real eye opener for the people who did not realise that shares are a form of gambling, that the biggest gamblers have no regard for, and that governments allow ordinary people's money to be risked without enough checks and balances. If not enough leadership is shown and the above changes are not considered there will be a backlash amongst ordinary people against this Government and many of the big money institutions we will be voting with our feet. Please consider this and do something .

Yours Sincerely.

Avinash Ayres
