

To the Treasury.

I urge you to support for international implementation of the Currency Transaction Development Levy and to reverse the trend to lower corporate and personal income taxes. Taxation should not continue to benefit the rich.

I also urge the government to consider a similar motor vehicle tax revamp to that proposed by the German Government, so that in future the rate depends on the amount of carbon emitted from exhausts.

Taxation should be fair and not something rich Australians should be able to hide from in tax havens.

Claire Varley
