

To whom it may concern,

I hope the Australian Government will support the international implementation of the Currency Transaction Development Levy (CTDL) which would tax the trade in foreign exchange, worth \$3,200 billion daily.

I also hope the trend to lower corporate and personal income taxes will be reversed This has only benefited the rich at the expense of the poor.

A clever initiative of the German Government is their revamping of motor vehicle tax so in future the rate depends on the amount of carbon emitted from exhausts. I hope the taxation review will recommend the Australian Government negotiate a similar arrangement with the States. This will contribute to decreasing our carbon emissions.

I also hope the Australian Government will do more to stop wealthy Australians from using tax havens to avoid their responsibilities. This hurts all Australians and needs to be ended.

Yours sincerely,
Clare Snowball
