

Dear sir/ms

As a matter of urgency, I strongly believe that the Australian Government should:

- a.. support an international implementation of the Currency Transaction Development Levy (CTDL) that would tax trade in foreign exchange
  - b.. reverse the trend to lower corporate and personal income taxes
  - c.. negotiate with the States to change the motor vehicle tax so that the rate depends on the amount of carbon emitted from exhausts
  - d.. develop strategies to stop wealthy Australians from using tax havens to avoid their responsibilities.
- Please note the Review Panel to the October New Internationalist Magazine for further background information.

Yours sincerely  
For a safer future
