

To Whom It May Concern:

In regards to the amendments to the Australian Taxation System, I make the following submissions:

-I urge the Australian Government to support the international implementation of the Currency Transaction Development Levy (CTDL) that would tax the richest market of all, the trade in foreign exchange, worth a staggering \$3,200 billion daily.

-I urge a reversal of the trend to lower corporate and personal income taxes, a trend that has benefited the rich at the expense of the poor over the past decade.

-The German Government has decided to revamp its motor vehicle tax so that in future the rate depends on the amount of carbon emitted from exhausts. I urge the taxation review to recommend the Australian Government negotiate a similar arrangement with the States.

-I urge the Australian Government to do more to stop wealthy Australians from using tax havens to avoid their responsibilities.

This Government has already made some excellent moves, in particular saying Sorry to Indigenous Australians. Please continue to support those who have not had a fair go under previous governments and consider these proposed amendments to our taxation system.

Best regards

Karin
