

In my submission I urge

the Australian Government to increase support for international implementation of the Currency Transaction Development Levy (CTDL) that would tax the richest market of all, the trade in foreign exchange, worth a staggering \$3,200 billion daily.

a reversal of the trend to lower corporate and personal income taxes, a trend that has benefited the rich at the expense of the poor over the past decade.

the taxation review to recommend the Australian Government negotiate a similar arrangement with the States to that of the German Government who have decided to revamp its motor vehicle tax so that in future the rate depends on the amount of carbon emitted from exhausts.

the Australian Government to do more to stop wealthy Australians from using tax havens to avoid their responsibilities.

Regards

Poul Grage
