

Hello

Australian Government must support the international implementation of the Currency Transaction Development Levy (CTDL) that would tax the richest market of all, the trade in foreign exchange, worth a staggering \$3,200 billion daily.

If taxed at 1/4 of 1% would raise \$8 billion a day. The current convulsions on Wall St, and in the banking system generally, indicate that the system is not serving the interests of the great majority of people, just a wealthy elite with their noses in the trough continually dreaming up fresh ways to rot the system. Enough is enough!!

Regards

Simon Dawson
