

Dear AFT Submissions.

These are recommendations that I would like to submit.

I urge the Australian Government to support the international implementation of the Currency Transaction Development Levy (CTDL) that would tax the richest market of all, the trade in foreign exchange, worth a staggering \$3,200 billion daily.

Also I suggest a reversal of the trend to lower corporate and personal income taxes, a trend that has benefited the rich at the expense of the poor over the past decade.

I believe that there should be a taxation review to revamp our motor vehicle tax so that in future the rate depends on the amount of carbon emitted from exhausts and I recommend the Australian Government negotiate a similar arrangement with the States.

I urge the Australian Government to do more to stop wealthy Australians from using tax havens to avoid their responsibilities.

Thank you for your time.

Tim Hurley.
