

We are a middle income Australian family who believe strongly in global justice. Taxation and the way in which governments deal with this matter in terms of fairness and equity leaves a lot to be desired. We would like to offer some solutions which we believe would go a long way to helping deal with a leading cause of global and local poverty.

- We urge Australian Government support for international implementation of the Currency Transaction Development Levy (CTDL) that would tax the richest market of all, the trade in foreign exchange, worth a staggering \$3,200 billion daily.
- We urge a reversal of the trend to lower corporate and personal income taxes, a trend that has benefited the rich at the expense of the poor over the past decade.
- The German Government has decided to revamp its motor vehicle tax so that in future the rate depends on the amount of carbon emitted from exhausts. We urge a taxation review to recommend the Australian Government negotiate a similar arrangement with the States.
- We urge the Australian Government to do more to stop wealthy Australians from using tax havens to avoid their responsibilities.

These solutions were suggested by NI. We think they are real solutions to deal with the fall out now being felt because of the worlds affair with capitalism. It is the perfect time to stand up and be counted.

Yours truly

The Durnin Family
